Housekeeping

- Q&A: Submit Questions At Any Time Via The Webinar Panel
 - Any questions we don't get to during today's call will be followed up via email
 - This is a flyover: happy to engage in further conversations as a result of any of today's topics – contact information at end of presentation
- We are recording today's presentation– all registrants will receive a link when it is ready to watch on demand

Agenda

- About RSR
- What Kind Of NRF Was 2017?
 - Practical vs. Inspirational
- What We Saw
 - Fun Stuff/Cool Stuff/Useful Stuff
- 5 Categories
 - BI / AI / Analytics
 - AR-VR / IoT / Robots
 - Selling Channel Convergence
 - The NRF iLab
 - Stores
- What Comes Next
 - A New Methodology Is Born

About RSR

- Founded in 2007: quickly became a leading source of insights for trends in retail technology, and retail in general
- Mission: To elevate the conversation about retail technology to a strategic level within the retail enterprise. Our differentiators:
 - **Objective Insights** No competitive intelligence or system selection
 - **Pragmatic Advice** to both retailers and solution providers
 - **Extensive Retail Industry Experience** lifelong retailers
 - **A Deep Bed Of Research** into retailers' technology investment plans and the business opportunities and challenges that drive those investments.

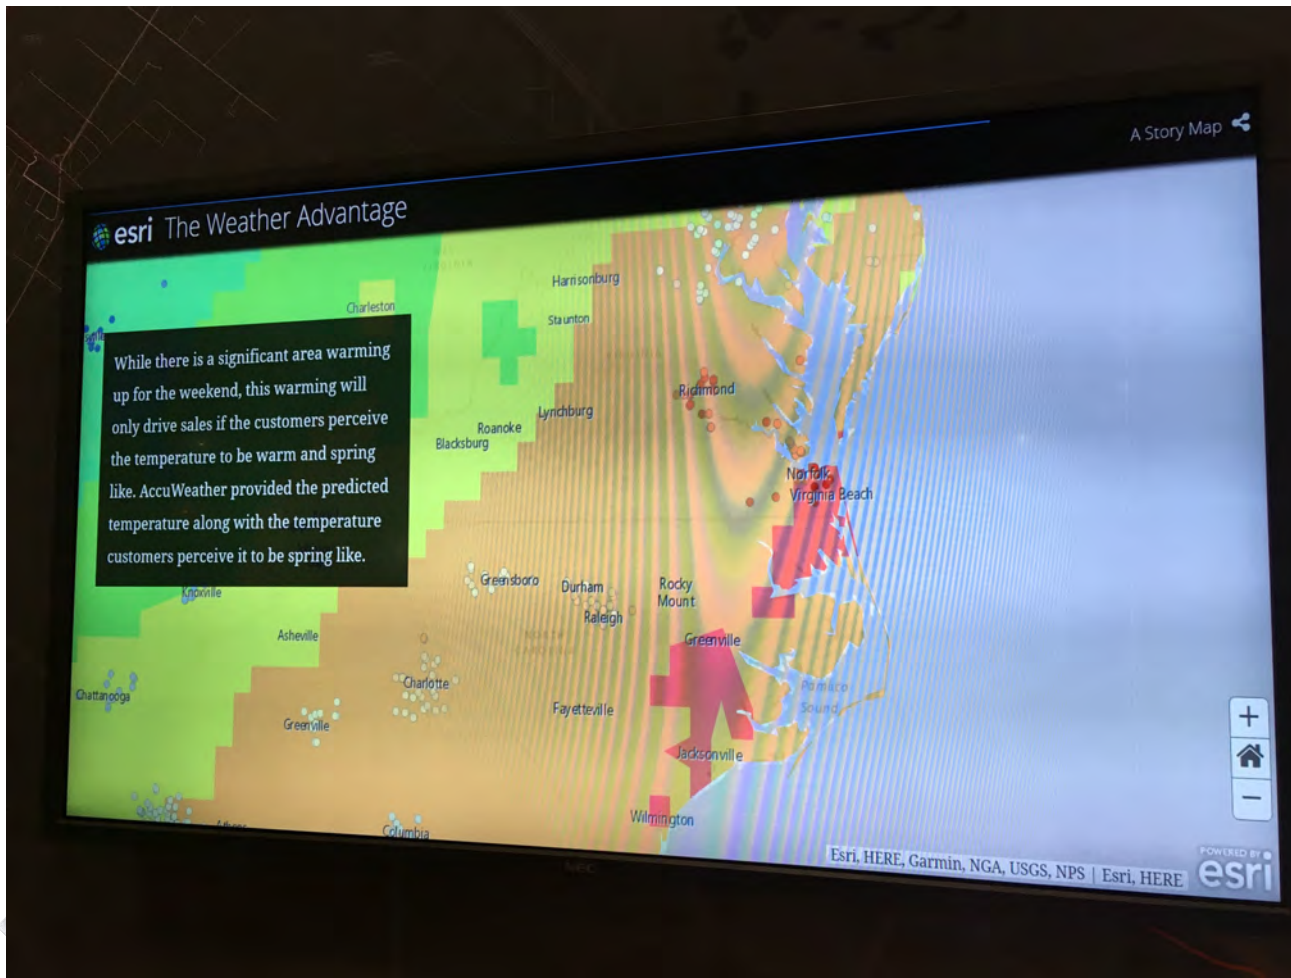

Show Overview

- Bigger!
 - Entire Javitz Center
- More crowded!
 - 33,000 attendees
 - 510 exhibitors
 - 300 speakers
- But at the same time... far less theoretical
 - Saw as much “practical” as we did “cool”
- Major themes:
 - BI / AI / Analytics
 - AR-VR / IoT / Robots
 - Selling Channel Convergence
 - The NRF iLab
 - Stores

BI / AI / Analytics

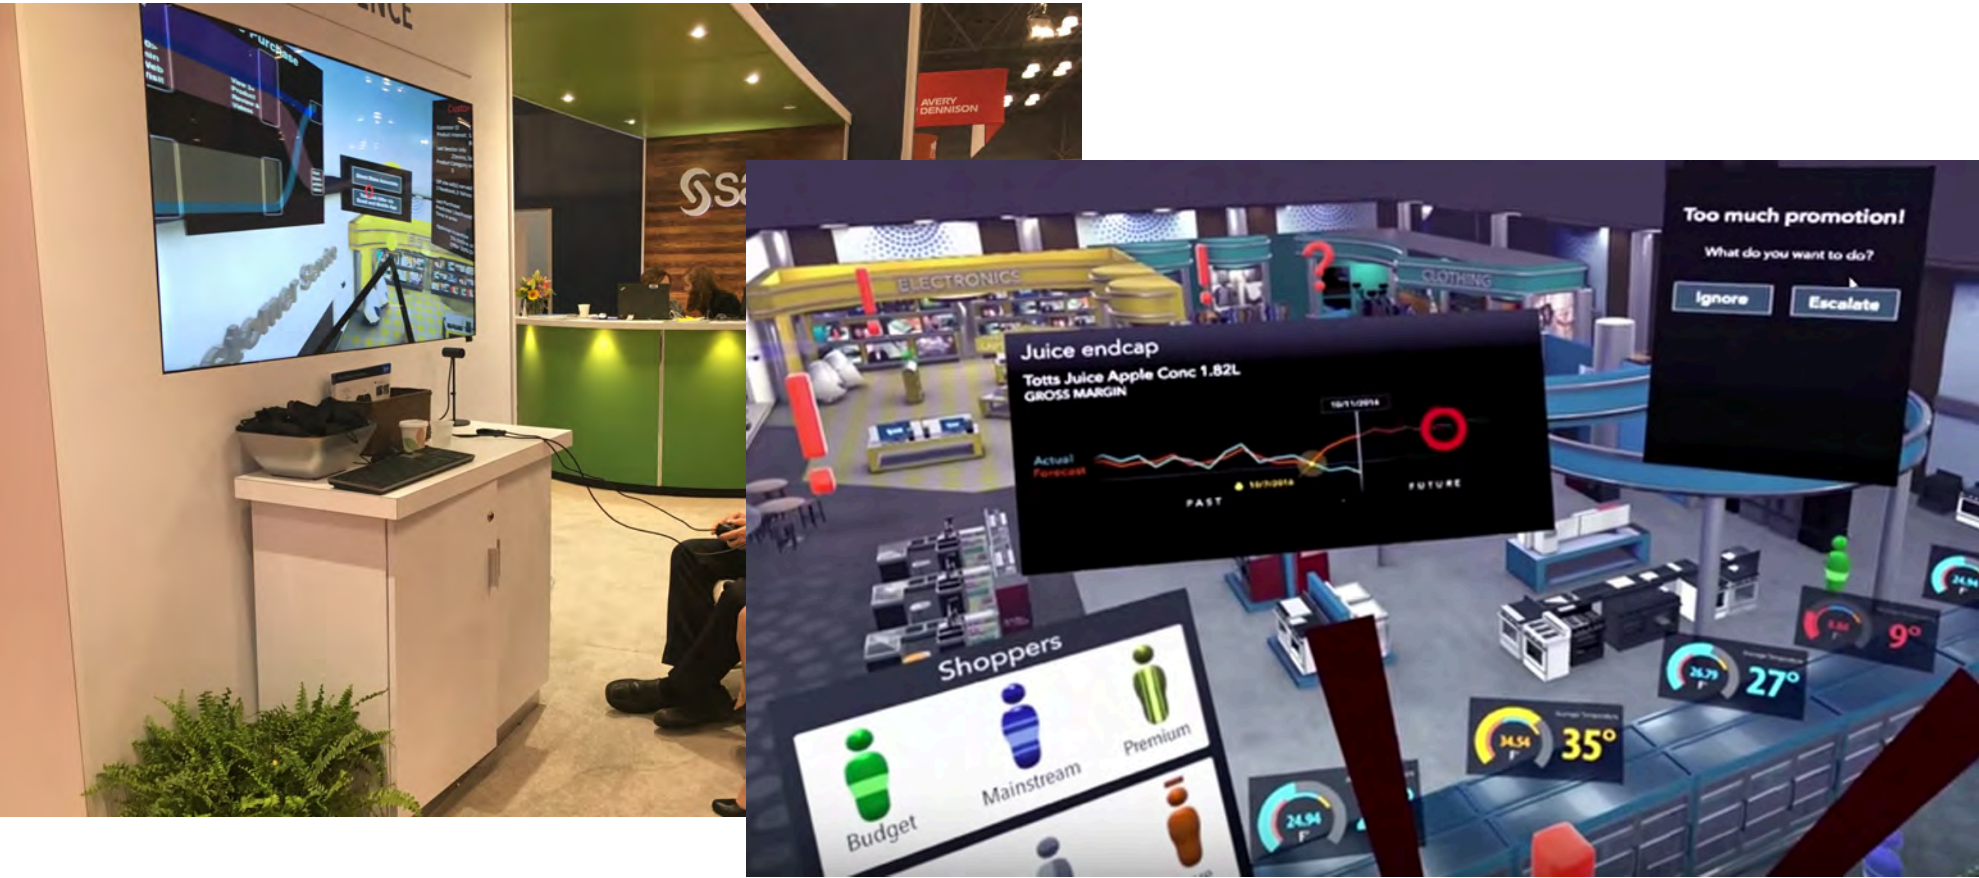

ESRI

- Combining multiple types of data sets
 - Weather
 - Customer behavior
 - Inventory
- Predictive
- Reaching deeper into customer preferences, purchases, micro-locations

One More!

Blackwood Seven

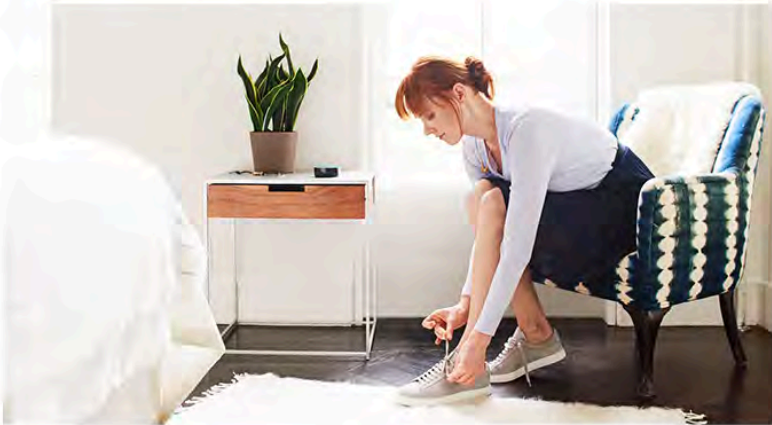

Uses AI to examine external corporate data to predict the effectiveness of advertising spend

AI & Natural Language Processing

Amazon's Alexa is a natural language platform that vastly simplifies how consumers interact with "the machine"

Meet Alexa

Turn up your music

Check the weather

Place an order

Hear the news

Using Alexa is as simple as asking a question. Just ask to play music, read the news, control your smart home, tell a joke, and more—Alexa will respond instantly. Whether you are at home or on the go, Alexa is designed to make your life easier by letting you voice-control your world. [Explore more things to try with Alexa.](#)

Alexa lives in the cloud so it's always getting smarter, and updates are delivered automatically. The more you talk to Alexa, the more it adapts to your speech patterns, vocabulary, and personal preferences. Alexa comes included with Echo and other Alexa devices.

"Alexa, play music."

"Alexa, find me a Chinese restaurant."

"Alexa, what's on my calendar today?"

"Alexa, re-order paper towels."

"Alexa, set timer for 20 minutes."

"Alexa, what's my commute?"

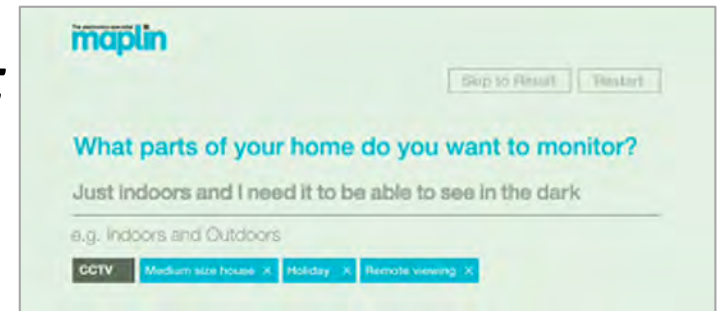

AI & Natural Language Processing

**You can do
it too!**

Manthan
"Maya"

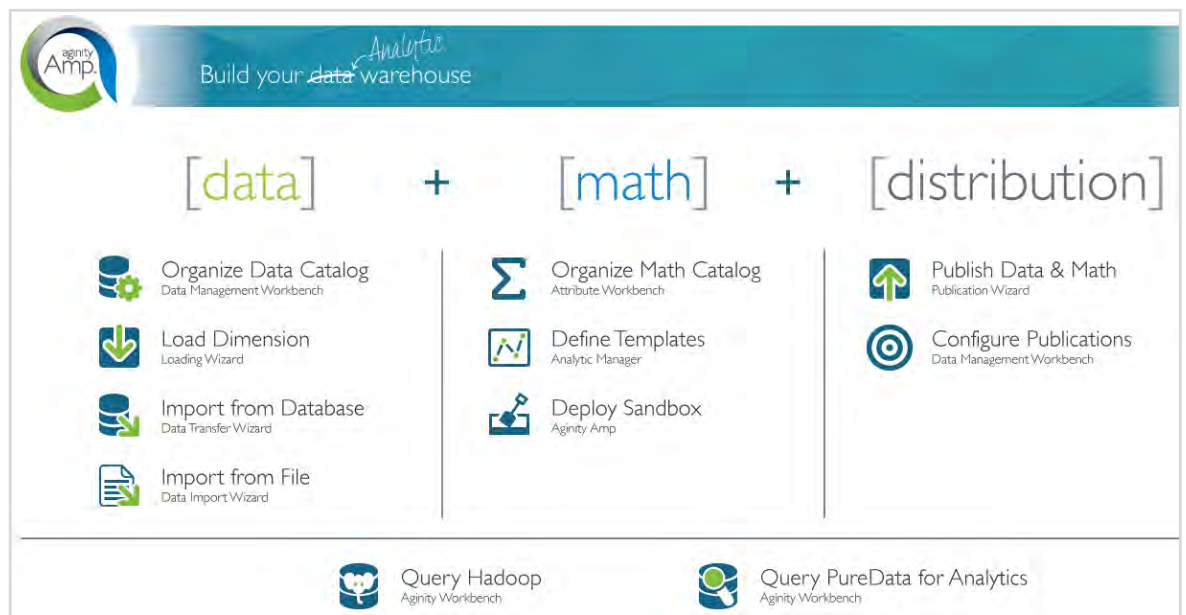

**... but it's not
just 'voice
activated'...**

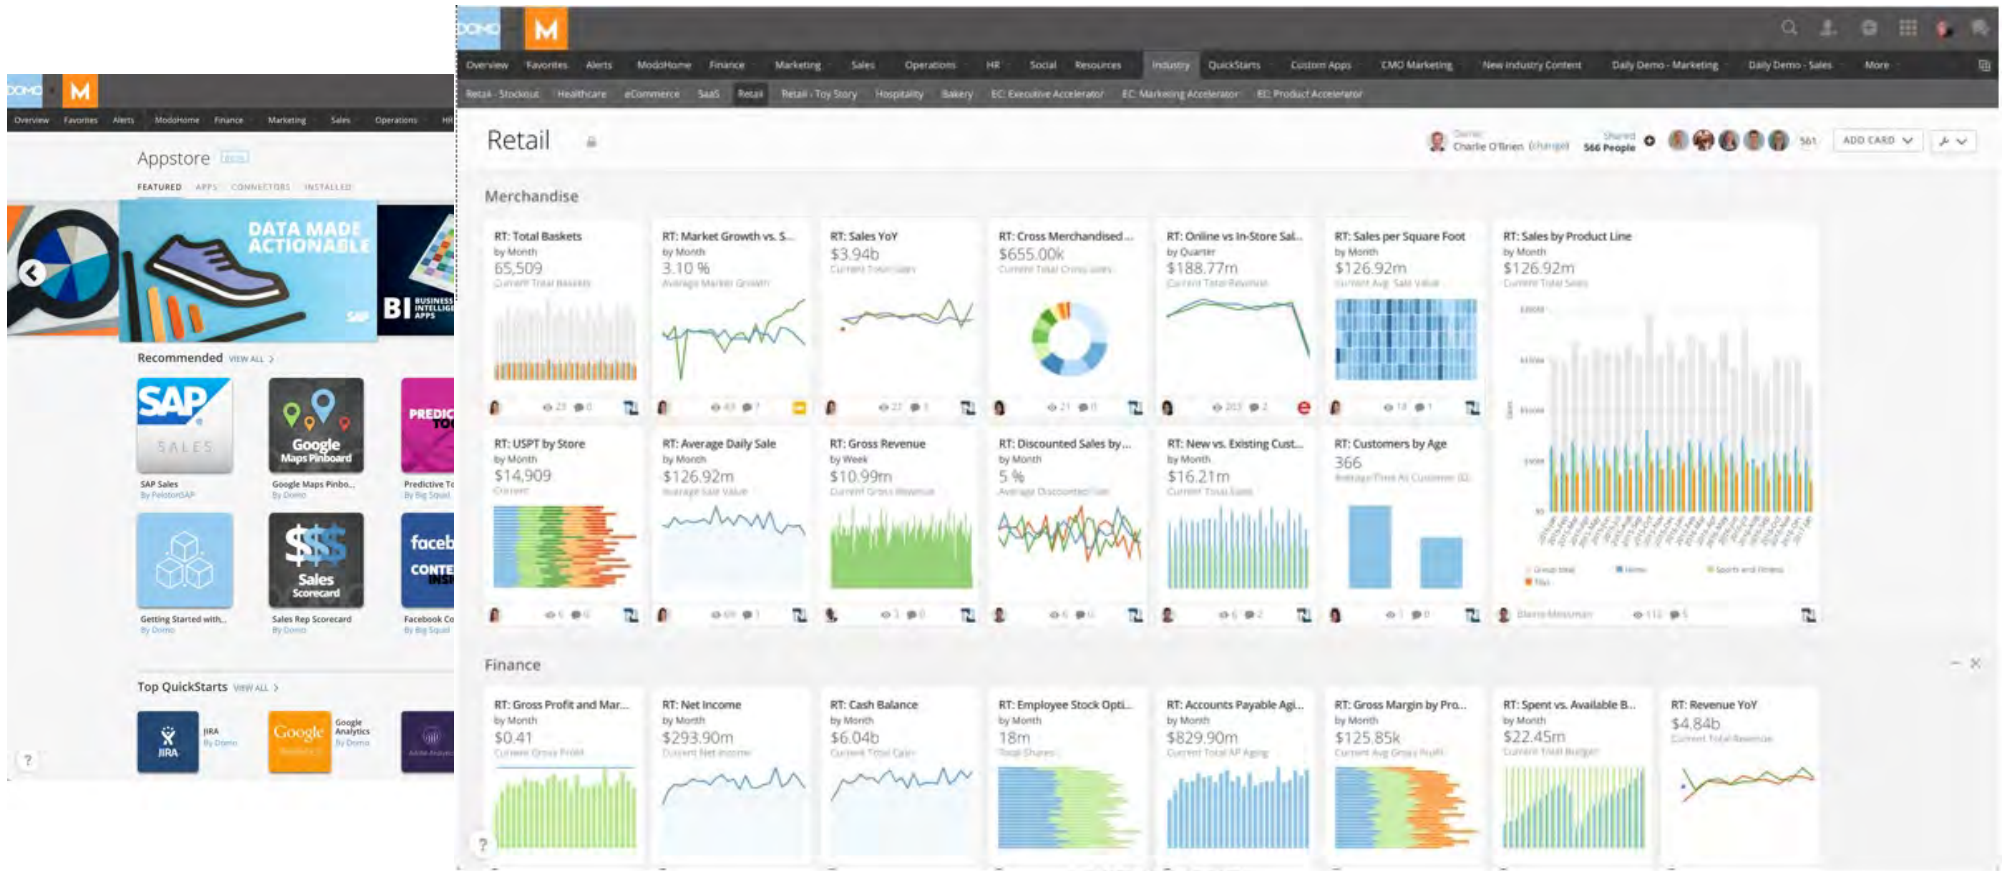

SAP hybrid and IBM Watson
Integration

Big Data Is Exploding Faster Than Your Data Analysts Can React....

Aginity AMP is solution that can automatically ingest new data attributes ('dimensions') and data analysis 'math', catalog and distribute data and math to downstream apps

STARTER

A New Research Format And Retailer Engagement Model For Retail Transformation

Retail Is Transforming

Matt Shay at NRF 2017: “We need to shake up the status quo...Innovate”

- But *how to do that?* The old adage “one size does not fit all” remains true

Ellen Davis at NRF 2017: Discussing NRF’s Rise Up Initiative: It’s all about people

- This is true! But what should those people actually be *doing?*

Transformation touches all aspects of the enterprise. Each piece synchronized to be part of a next generation whole.

We believe a new methodology needed to address this transformation in key retail areas.

An idea we’ve been putting together, first presented at NRF based on 10 years of benchmarking. Looking for feedback.

The Report And The Analysis

S

What's The Strategy?

Competitive Advantage

Volume vs. Touch

Current Processes

Measurements

T

What Tactics support that strategy?

So Many Possible Areas To Explore

- Stores
- Supply Chain
- Merchandising
- Marketing
- eCommerce
- Product Lifecycle Management
-and?

First Up: Store Readiness Assessment

A Store Health Check: Sponsored by Aptos

- Why start with the store? The store is in trouble
- The biggest asset, the place where most transactions happen
- Likely the most profitable part of the enterprise
- Even retailers considered omni-channel leaders falter
- Incremental change is not enough, transformation is necessary
- Radical change expensive and risky (store contribution is fragile)
- Needed: Something to help retailers think radically, while operating within very real constraints of current economics

Things to Note:

- If you're a retailer, check your inbox tomorrow for a special invitation to participate in Store START
- Report will come out in April, presentation at Aptos Engage in Hollywood, Florida
- Retailers interested in getting involved with STARTER, please contact Linda Wolfe
- Many thanks to Aptos for getting the ball rolling for us – Survey launching soon!
- Let us know which part of the business you'd like us to cover next
- Feedback is important (especially on the engagement model)!!

Thank You
